

RFP QUESTIONS & ANSWERS, POSTED MARCH 21, 2013
SAN PABLO AVENUE GREEN STORMWATER SPINE

1. Will the Spine Project use StopWaste.Org's Technical Assistance Program, which provides up to 40 hours of Advisor support to the project team?

No, we do not intend to use this program for this project.

2. Does the "12 pages double-sided" mean 12 sheets of paper with up to 24 pages of information?

No. We will accept proposals that are 12-pages of information total.

3. Are the 8 separate sites in 7 different municipalities to be considered one project rated in entirety, or is the rater to rate each individual site as separate project sites?

The rater is to rate each individual site separately.

4. Will Bay Friendly have a corrected Accountability Form with correct signatures lines that correlate with the Rater Manual in place by the time it is needed toward the end of the project, or will the rater have to make corrections to the Accountability form?

The Bay-Friendly Coalition updated the Bay-Friendly Rated Accountability Form in February 2013 to correct numbering issues for practice B.2.e, and the omission of practice G.7.a. The corrected Form can be found here: <https://www.bayfriendlycoalition.org/RaterTools.shtml>

5. How many different contractors will be bidding on the project? One for the entire project or one for each jurisdiction?

We have no control over the number of bidders. However, the intent is to hire a single contracting entity to construct all facilities.
